

Kyle Reginaldo

Flutter Developer

I am Kyle Reginaldo, an accomplished developer specializing in mobile application development using Flutter. Proficient in crafting robust backends with NestJS, I bring a wealth of expertise to the table. My mastery extends to leveraging Firebase, Supabase, and Google Cloud Platform (GCP) to architect scalable and efficient solutions. I invite you to peruse my portfolio, where the convergence of Flutter proficiency and backend acumen is exemplified, underpinned by a comprehensive understanding of cloud services.

○ Crypto App

2 months

Flutter Developer

I was given the opportunity to create a blockchain-based mobile app by Avyan Global. I gained a better understanding of blockchain through this endeavor.

○ Attendance Management App

1 month

Flutter Developer

This app is for students who are enrolled in a particular school. They may use this app to check their attendance and see how many times they have been absent.

○ Laundry Booking App

2 months

Flutter Developer

Using this app, you may schedule laundry service for your clothes. You may also track the status of your laundry through this app.
